<b>Danish</b>	Can read

## ABOUT

I'm a software developer from Antwerp, Belgium who's lived in Stavanger, Norway for 4.5 wonderful years. As a developer, I'm a generalist and have experience with both frontend and backend development. I love trying out any new technology that arises and am particularly fond of anything to do with webdevelopment. I have contributed to and am interested in FOSS.

**I am currently looking to shift my career towards teaching people software development.**

## WORK EXPERIENCE

### Software developer & Coach — Take the Lead

Jan 2019 – Present

 Antwerp, Belgium

**Activities:** Mentoring co-workers in learning React & Typescript

**Used technologies:** Typescript, React, Redux

### Lead frontend developer — Altibox AS

Jan 2018 – Mar 2019

 Stavanger, Norway

**Activities:** Same responsibilities as previous position, with in addition:

- Implemented the new Web-TV for Altibox (<https://tv.altibox.no>) using Typescript & React
- Introduced pull request workflow, main reviewer of frontend code
- Mentoring co-workers in learning React & Typescript

**Used technologies:** Typescript, React, Redux, Docker

### Software developer — Altibox AS

Sep 2014 – Dec 2017

 Stavanger, Norway

**Activities:** Frontend developer on the Altibox website (<http://altibox.no>).

- Created new and updated existing "selfcare" applications to either order new products or manage settings for owned products. (Single page javascript applications talking to an api)
- Streamlining/modernizing of development process by introducing gulp, handlebars.js, nightwatch.js,ES6
- General development on all the other frontend applications (bugfixes, improvements, . . . )
- Responsible for upgrading Bootstrap from version 2 to 3.
- Migrating the Altibox website CMS from Liferay to Wordpress.

**Used technologies:** Git, node.js, Javascript ES6, Twitter bootstrap, Babeljs, Wordpress, Handlebars.js, Nightwatch.js, Gulp

### Software developer — Unbrace

Jul 2013 – Aug 2014

 Antwerp, Belgium

**Activities:** All-round developer on BVC Spot Buy Center, implemented large parts of the Javascript frontend application and RESTful webservices backend.

**Used technologies:** ServiceStack (.NET), Backbone, Backbone.Marionette, RavenDB, RequireJS, HTML5, CSS3, Twitter bootstrap, responsive design, Git

### Software developer — Item Solutions

Sep 2011 – Jun 2013

 Antwerp, Belgium

**Activities:** Main developer on Aertssen WOP Drag & Drop, a time schedule tool for a contractor who is active worldwide.

Team member on ASLMv3, a web application for Alcatel-Lucent to manage their software licenses. Team member on CEOPS, a business strategy tool.

**Used technologies:** .NET (3.5, 4, 4.5), Silverlight (3-5), T-SQL, Oracle, (N)Hibernate, Dapper, RhinoMocks, Moq, KnockoutJS, RequireJS, jQuery, Spring, Spring MVC, SVN

## EDUCATION

Diderot

*Nov 2018 – Sep 2018*

99%

Basic Life Support Adults + AED usage — Lifeguard

*Mar 2019 – Mar 2019*

4 hours course

## HOBBIES

---

Besides at my work I also love programming in my spare time. For some examples of code I've written you can take a look at my [Gitlab](#), [Github](#) or [Bitbucket](#) accounts. Links to these can be found on my personal website if you're holding the paper version of my resume (the pdf of which is automatically generated from a yaml file after pushing to my resume repository :)).

Besides sitting behind the computer I've also hitchhiked about 5000 km accross Europe and am an amateur gardener.

I love hiking and have hiked some of Norway's best known landmarks like Preikestolen, Kjeragbolten and Trolltunga.

Sometimes I try out new things just because they sound interesting like pinhole photography, salsa dancing or brewing my own beer.
