ABOUT

I'm a software developer from Antwerp, Belgium who's lived in Stavanger, Norway for 4.5 wonderful years. As a developer, I'm a generalist and have experience with both frontend and backend development. I love trying out any new technology that arises and am particularly fond of anything to do with webdevelopment. I have contributed to and am interested in FOSS.

I am currently looking to shift my career towards teaching people software development.

WORK EXPERIENCE

Software developer & Mentor — Take the Lead

Jan 2019 – May 2019

Activities: Software developer on an SPA using React + TS, mentoring junior developers & interns.

 Antwerp, Belgium

Used technologies: Typescript, React, Redux

Lead frontend developer — Altibox AS

Jan 2018 – Mar 2019

Activities: Same responsibilities as previous position, with in addition:

- Implemented the new Web-TV for Altibox (<https://tv.altibox.no>) using Typescript & React
- Introduced pull request workflow, main reviewer of frontend code
- Mentoring co-workers in learning React & Typescript

 Stavanger, Norway

Used technologies: Typescript, React, Redux, Docker

Software developer — Altibox AS

Sep 2014 – Dec 2017

Activities: Frontend developer on the Altibox website (<http://altibox.no>).

- Created new and updated existing "selfcare" applications to either order new products or manage settings for owned products. (Single page javascript applications talking to an api)
- Streamlining/modernizing of development process by introducing gulp, handlebars.js, nightwatch.js, ES6
- General development on all the other frontend applications (bugfixes, improvements, . . .)
- Responsible for upgrading Bootstrap from version 2 to 3.
- Migrating the Altibox website CMS from Liferay to Wordpress.

 Stavanger, Norway

Used technologies: Git, node.js, Javascript ES6, Twitter bootstrap, Babeljs, Wordpress, Handlebars.js, Nightwatch.js, Gulp

Software developer — Unbrace

Jul 2013 – Aug 2014

Activities: All-round developer on BVC Spot Buy Center, implemented large parts of the Javascript frontend application and RESTful webservice backend.

 Antwerp, Belgium

Used technologies: ServiceStack (.NET), Backbone, Backbone.Marionette, RavenDB, RequireJS, HTML5, CSS3, Twitter bootstrap, responsive design, Git

Software developer — Item Solutions

Sep 2011 – Jun 2013

Activities: Main developer on Aertssen WOP Drag & Drop, a time schedule tool for a contractor who is active worldwide.

 Antwerp, Belgium

Team member on ASLMv3, a web application for Alcatel-Lucent to manage their software licenses.
Team member on CEOPS, a business strategy tool.

Used technologies: .NET (3.5, 4, 4.5), Silverlight (3-5), T-SQL, Oracle, (N)Hibernate, Dapper, RhinoMocks, Moq, KnockoutJS, RequireJS, JQuery, Spring, Spring MVC, SVN

EDUCATION

Teach English Now! Theories of Second Language Acquisition —

Arizona State University

Mar 2018 – Mar 2018

94%

Basic Life Support Adults + AED usage — Lifeguard

4 hours course

Mar 2019 – Mar 2019

HOBBIES

Besides at my work I also love programming in my spare time. For some examples of code I've written you can take a look at my Gitlab, Github or Bitbucket accounts. Links to these can be found on my personal website if you're holding the paper version of my resume (the pdf of which is automatically generated from a yaml file after pushing to my resume repository :)).

Besides sitting behind the computer I've also hitchhiked about 5000 km accross Europe and am an amateur gardener.

I love hiking and have hiked some of Norway's best known landmarks like Preikestolen, Kjeragbolten and Trolltunga.

Sometimes I try out new things just because they sound interesting like pinhole photography, salsa dancing or brewing my own beer.
